

Initial Training for Air Traffic Controllers

Basic Course

Course Objectives

The general aim of the course is to impart fundamental knowledge, skills and behaviour to enable student ATCOs to progress to Procedural, Radar or Aerodrome Control Rating Training. Students will understand the necessity of a safe and expeditious ATM service and will be able to

- apply basic operational procedures
- to provide basic separation procedures

Content

Subjects according to the CCC guideline:

- Introduction
- Aviation Law
- Operational Procedures
- Meteorology
- Navigation
- Aircraft and Principles of Flight
- Human Performance
- Equipment

Who should attend

Individuals who want to become an Air Traffic Controller

Entry requirements

Students who successfully passed a selection test for Air Traffic Controller Training

Course Duration

16 weeks

Starting dates

on request

Assessment and Certificate

Continuous assessment and permanent feedback procedures are integral parts of the course.

A holistic test system supports a lasting memorisation of important topics. The final course performance is tested in form of a practical examination in a simulator and will be certified according to European Standards.

Additional Remarks

This course complies with the European "Guideline for Common Core Content and Training Objectives for Air Traffic Controllers Training - Phase I". Aviation English, national aviation law or other additional subjects as well as customer-oriented simulation procedures can be added on request. Examinations can be adapted to national requirements

Teaching Methods

- Lessons, Demonstrations
- Case Studies
- Supervised Practice
- Interactive CBT, Hands on
- Simulation, Role Plays
- Briefing/Debriefing

The course includes practical training by means of CBT, Part Skills Trainers and Simulators parallel to the theoretical instruction
