

Advanced Training Tower Emergency Course

Course objective

The course participants have acquired basic knowledge of the handling of unusual and emergency situations and are familiar with the use of emergency check lists

Course content

- Refresher of theoretical background knowledge
- Development of situational awareness
- Basic procedures for emergency situations at an aerodrome
- Co-operation between cockpit crew and ATC
- Simulation of reactions and measures based on emergency check lists
- Control and co-ordination procedures in emergency situations
- Application of the ASSIST principles

Who should attend

Air Traffic Controllers after completion of their initial training

Course length

5 days

Participants

Minimum 6
Maximum 8

Training Methods

- Lectures
- Computer based training
- Examples
- Videos
- Simulation

Language

English or German

Price

3.990,-€ per student + VAT (16%)
